

RF Sampler Options

The sampler I mentioned during my Contest University presentation was designed by Tom, W0IVJ. It is described in ARRL Handbooks, and ARRL Antenna books for the last several years. Tom suggests looking at the author index under Tom Thompson.

If someone prefers to buy a sampler, Tyler, KA0KA, has a product that may also work. If more attenuation is needed, Mini-Circuits 50 ohm BNC to BNC attenuators are often available on eBay.
