

Tower Safety

Tim Jellison W3YQ/KL7WV

Safety procedures

- First – check for power lines
- Use a proper harness and lanyards
- 100% Tie-off. NO FREE CLIMBING
- EVERYONE wears a hardhat
- Never “EVER” ride a rope, capstan, hoist

A full-body harness aids in rescuing you from the tower should that become necessary.

If using a fall arrest lanyard, the tie-off point is critical. Don't trust Rohn cross braces. They're not strong enough.

Snap around the tower leg instead

Plus, you can get a harness with a seat strap. These are the best!!!

Be careful at the top of the tower.
Don't let the lanyard slip over the top.

- If hiring a tower crew, use only certified climbers
- Consider becoming a certified climber yourself

Open forum and discussion.

And above all, when climbing follow all
safety rules!

NO SK's
