# QRP/Lower Power Contesting

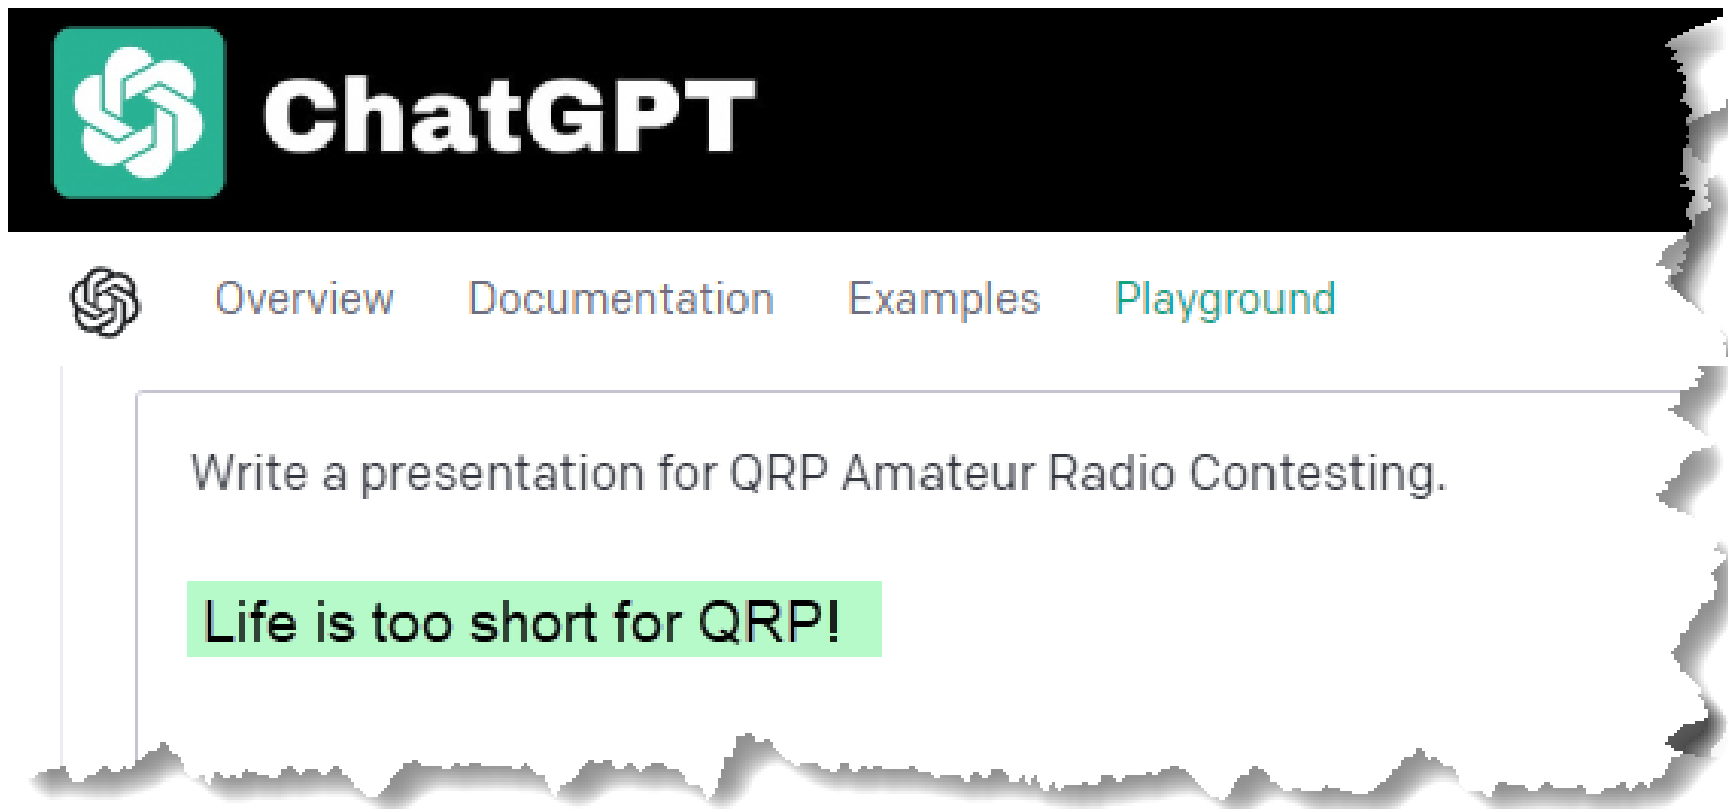

- Before we start, a short survey to allow me to best adjust focus of this session
  1. QRP or Low Power?
    - How many are LP power? / How many QRP ops?
  2. How many years of Contesting?
    - Just getting started / Less than 5 years / 5 to 10 years / 10 to 20 years / over 20 years

# QRP Contesting

- I thought I could save time by asking Chat GPT to use AI to write this presentation, but...

# QRP/Lower Power Contesting

## ● Today's Topics

- QRP & Low Power Definitions & Why?
- QRP Myths & Myth Busting
- Differences in QRP/LP vs. QRO Contesting
- Getting Started with QRP/LP & Operating Tips
- Successfully Making Exchange
- Contest Selection
- Addendum

**Homework  
Will Be  
Required!**

# Definition – QRP

- Most contests & awards recognize **5 Watts** as **QRP** for all modes
- A small minority of organizations use 10 watts PEP on SSB, but this is not recognized by most award/contest sponsors as QRP
- **QRPp** is name for even lower power also called **Milliwatting** using < 1 watt output power

# Definition– Low Power (LP)

- Most contest & awards recognized 100 Watts or less as Low Power for all modes
- A small minority of organizations use 150 watts but this is not recognized by most award/contest sponsors as Low Power
- Recently ARRL has switched from 150 to 100 Watts

# Decision- QRP or LP

- Most casual contesters choose Low Power over High Power (1500 Watts) because their radios have 100 Watt output & they have no amplifier
- The decision of Low Power vs. QRP is typically not an equipment issue but one of individual choice, style, challenge, etc.
- Most tips & strategies in this presentation apply to both QRP & Low Power, with exception of calling CQ (running)

# The Challenge?

A challenge

# Why QRP?

- Why do testers choose QRP?

- **The Challenge**

- Awards
- Contests
- Personal Goals

# Why QRP?

- “Why I Operate QRP”  
is similar to the  
statement...  
“Why I Fly Fish”

# Why Not QRP?

DO NOT CONSIDER  
FLY FISHING!

THERE ARE FAR EASIER WAYS TO CATCH FISH

# QRP Myths

-  You must use a QRP only radio
-  You must use CW Only
-  You can't Win Contests
-  You can't use beams or good antennas
-  You cannot work DX
-  You must use QRP all of the time

# QRP Myth Busting

- ⊘ You must use a QRP only radio
- ✓ Most QRO (100 watt) radios can be adjusted for lower power output
  - Follow manufacturer's suggestions
  - Adjust ALC, turn down drive, etc.
  - For further, precise power reduction, use step attenuators

# QRP Myth Busting

- ⊘ You must use CW Only
- ✓ Although a majority of QRP operators historically used CW, many use SSB
- ✓ Recent popularity of Weak Signal Digital Modes– *FT8 & FT4*  have become very popular for QRP ops

# But, If You are Interested in CW

- CW is a potent tool for making QRP contacts
- **You do not need to be a CW expert** to make CW Contest QSOs
- See presentation *Fun with Morse* (if you are not a CW op & are interested in getting started)

# QRP Myth Busting

- ⊘ You can't Win Contests
- ✓ Most contests have separate categories for QRP operators so you are only competing against other QRP Ops

# QRP Myth Busting

✓ Most contests have separate categories for QRP

## 2022 CQWW DX SSB TOP SCORES

### WORLD SINGLE OPERATOR

HIGH POWER All Band	LOW POWER All Band	QRP All Band

# QRP Myth Busting

- ⊘ You can't use beams or other good antennas
- ✓ You certainly CAN!
- ✓ Don't confuse low power with poor signals
- ✓ Unlike high power amps, the gain of antennas benefits you twice- once on transmit and again on receive

# QRP Myth Busting

⊘ You should always append QRP to your callsign

- ✓ You can choose to, but I strongly suggest you **DO NOT**
- ✓ Some stations will not answer because they assume it is going to be too hard to complete the QSO
- ✓ But if a station is calling for QRP stations, feel free to apply if you are operating QRP either way

# QRP Myth Busting

- ⊘ You cannot work DX
  - ✓ Maybe you will not be first to break the pileup but with patience and good operating practices you can work plenty of DX
  - ✓ Many QRPers work contests because they are a good chances for DX

# QRP Myth Busting

## ✓ My QRP Operating Results\*

- >110,000 QRP QSOs
- DXCC Mixed 328 (317 Confirmed)
- WAS 11 Bands (160 to 6M)
- WAZ (CQ Worked All Zones)– 3 bands
- ITU Zones 76 out of 77
- DXCC Challenge – 1666
- Grids (AA##) – 2127

Mode	DXCC
CW	315
SSB	305
RTTY	189
FT8/FT4	244
DATA	265
ALL	328

\* Note this is over a 40+ year operating history with majority in last 20 years

# QRP Myth Busting

## ✓ My QRP Operating Results

- Working QRP DXCC, especially, on lower bands can greatly benefit from FT8/FT4 & CW

Band	CW	SSB	FT8/FT4	RTTY	TOTAL DXCC	Band
Mixed	315	306	244	190	329	Mixed
160M	57	11	67	1	82	160M
80M	102	64	64	10	119	80M
60M	2	3	73	29	77	60M
40M	166	85	56	12	173	40M
30M	139	-	89	-	168	30M
20M	269	227	184	123	299	20M
17M	239	147	184	46	279	17M
15M	242	206	159	99	276	15M
12M	214	252	115	86	233	12M
10M	191	101	120	44	283	10M
6M	23	24	37	1	52	6M

# Differences in QRP vs. QRO Contesting

- Besides obvious power difference other differences include
  - Strategy of
    - Planning
    - Operating Style
  - Less margin for error
  - You won't work everyone you hear!

# QRP Contesting

- QRP Contesting often seems like you are always climbing uphill...

# QRP Contesting

- ...with very little margin for error
- But it can be done successfully!

# Winning Contest Factors

Factors Contributing to Contest Scoring Success		
1	<b>Number of QSOs</b>	Running (Calling CQ) with prolonged high rates is key to high numbers
2	<b>Point Values of QSOs</b>	Can be greatly influenced by Geographic Location
3	<b>Multipliers</b>	Importance to Final Score influenced by individual Contest's Rules
4	<b>Secondary Multipliers</b>	Varies by Contest, may include Power and/or Mode multipliers, Multipliers by Band, by Mode or One Time, Scoring by Distance, Bonus Points for working certain stations or station types
5	<b>Accuracy</b>	Avoiding UBNs, Lost Points, Lost Multipliers, Penalties, etc.
6	<b>Competition</b>	Who are you competing against varies by year, category, etc.

# Differences in QRP vs. QRO Contesting

- Number of QSOs

- When operating **QRO**, Calling CQ (a.k.a **Running** or Park & Bark) is King-

**“If you’re not running you’re losing”**

- Other option is Answering Others’ CQing (a.k.a. Search & Pounce, S & P, Hunt & Pounce or Click & Call)

- See “*Contesting 101 Operating*” (section on How to Search and Pounce) by K1DG

CQ CQ  
CQ TEST

# Differences in QRP vs. QRO Contesting

- CQing QRO vs. QRP

# Differences in QRP vs. QRO Contesting

- Number of QSOs
  - Most QRPers & many LP contesters do a lot of “Search & Pounce”
  - Most beginning contesters typically use S & P, especially on CW

# Differences in QRP vs. QRO Contesting

- Number of QSOs

- With QRP, Running is Difficult Unless...

- You are a rare multiplier
    - You have a killer antenna farm
    - You are an elite operator
    - Band has a lot of open space
    - You pick an Opportune time
    - 2nd day or near end of contest

# Differences in QRP vs. QRO Contesting

- Number of QSOs
  - Search & Pounce Aids
    - Logging Software Bandmap
      - Assisted- from spotting & tuning
      - Non-Assisted- from tuning
    - Radio Band Scopes or external Waterfalls
      - SDRs & Software
      - See The “*Advantages of Waterfall Displays for Contesting and DXing*” by N6TV

# Differences in QRP vs. QRO Contesting

- Search & Pounce – Obstacle to QRPer!

# Differences in QRP vs. QRO Contesting

- Number of QSOs

- You still want to maximize # of Qs with QRP but may need to use special strategies
  - Be there just as band opens or closes
  - Be “fresh meat” near end of contest
  - SOR2 or Modified Hunt & Pounce *2BSIQ* (Two Bands Synchronized Interleaved QSOs) both tricky, but not impossible with QRP
  - Strategic periodic CQs under specific conditions

# Differences in QRP vs. QRO Contesting

## ● Point Values of QSOs

- On both QRO & QRP, this is all about location, location, location just like real estate
  - In CQ WW your zone and country make a big difference (this is often why contesting stations are where they are)
  - Big difference with QRP is if you are located in a rare or desirable zone or country, you have better chance of running

# Differences in QRP vs. QRO Contesting

## ● Multipliers

- While working most available Multipliers can be an important part of a Running a QRO station, it is often not as important as high rates
- With QRP, Multipliers often play a much bigger role in higher scorers
  - Even more important with CQ WW and other contests with double multipliers and lots of mults available on each band

# Differences in QRP vs. QRO Contesting

## ● Multipliers

- QRP operators need to pick up “cheap mults”
  - Don't forget no point mults in CQ WW
  - Working in All Band category, try to work all open bands even if just for a few minutes as each new contact on new bands are often new mults
  - Have a checklist of expected mults and a strategy/hourly plan for working them

# Differences in QRP vs. QRO Contesting

## ● Finding Multipliers

- If you are working Assisted you can use Clusters, RBN, even a local Skimmer
- Unassisted (and Assisted)
  - Have strategies, band change schedule, etc.
  - Understand Propagation
  - If you can't easily work a multi make a note (and/or add to bandmap) for later or next day on same freq or band & time
  - Quick detection of who's there

# Multiplier Trap

- Avoiding the Multipliers Only Trap
  - Although multipliers can be important you still need **points** to **multiply** them by

$$\text{Points} \times \text{Multipliers} = \text{Score}$$

# Multiplier Trap

- Avoiding the Multipliers Only Trap
  - If you get too focused on mults you will miss points
    - Work the 2nd, 3rd, etc. instance of a mult, not for mult but for points
    - If you are not CQing you need to be **Harvesting Qs**
    - Understand which target Point QSOs prove easier, abundant points
      - Targets usually vary based on geography & band
      - Don't waste too much time on nonproductive bands

# Low Hanging Fruit

- Harvesting Points- Low Hanging Fruit (stations vary by your location)

# Low Hanging Fruit

- Most frequently worked prefixes by Mode from my Ohio location)
  - Factors affecting frequency of contact
    - Ham population of each DXCC
    - % of Contesters in each DXCC
    - Your location & distance/path of DX
    - Propagation
    - Bands being used
    - Mode interest by country

	CW	SSB	RTTY	FT8	ST
1	K	K	K	K	CA
2	VE	VE	VE	VE	TX
3	DL	I	I	DL	FL
4	UA	DL	DL	I	WA
5	I	EA	EA	F	OH
6	G	G	UA	EA	NY
7	OH	LU	UR	G	PA
8	HA	PY	G	PY	NC
9	S5	F	KH6	UA	MI
10	OL	OH	LU	PA	AZ
11	F	UA	XE	SP	VA
12	SM	JA	9A	JA	IL
13	EA	S5	OL	ON	OR
14	SP	SM	ON	LU	GA
15	9A	KP4	P4	ZL	TN
16	PY	ON	YV	XE	CO
17	YU	HA	PY	UR	UT
18	UR	SP	F	UA0	IN
19	KH6	GM	SP	VK	MO
20	LU	XE	PA	GM	NJ
21	UA0	KH6	GM	HI	MA

# Differences in QRP vs. QRO Contesting

## ● Secondary Multipliers

- Some contests have a point multiplier...
  - for power level
  - for specific modes
  - for specific bands
    - typically lower freq bands in HF
    - typically higher freq bands in VHF/UHF
  - for working a QRP station (Stew Perry Topband)

# Differences in QRP vs. QRO Contesting

## ● Accuracy

- As a QRP signal you have a greater chance for stations busting your call/exchange
  - Use Standard NATO/ITU Phonetics or carefully selected substitutes for clarity (esp. non-English speakers)
  - Use good CW sending with proper spacing, judicial use of cut numbers, weighting, etc.
  - See “Busted Callsigns” – [link](#)
  - If your call is problematic consider a Call Sign Change

# Differences in QRP vs. QRO Contesting

- Accuracy– Consider a Call Sign Change
  - Slideshow– [tiny.cc/idealcall](http://tiny.cc/idealcall)
  - Video Recording– [youtu.be/BmI9LGdt6aY](https://youtu.be/BmI9LGdt6aY)

# Phonetics to Definitely Avoid

## ● Phonetics to Definitely Avoid

Phunny Photenitics		
A- Are	J- Junta	S- Sea
B- Bee	K- Knife	T- Tsunami
C- Cite	L- Llama	U- Understand?
D- Double-U	M- Me	V- Vie
E- Eye	N- Nine	W- Why
F- Five	O- Owe	X- Xylophone
G- Genre	P- Pseudonym	Y- You
H- Honest	Q- Queue	Z- Zero
I- I	R- Rap	

# Differences in QRP vs. QRO Contesting

## ● Competition

- Most contests have separate QRP category or categories, so you are only competing against other QRP stations
- Often QRP categories have many fewer competitors than Low Power category
- Just as in QRO categories, who else enters is outside of your control

# Getting Started with QRP

## ● Steps

1. Get on HF Bands; if you are not already
2. Try turning down your current rig's output power level or pick up (or borrow) a QRP radio
3. Check out the Top 15 Tips
4. Make QRP contacts
5. Use additional resources to learn
6. Join a QRP Club
7. Make more contacts and have fun!

# Contesting with QRP

- QRP Only Radio vs. 100 Watt radio with power turned down
  - Just as with low power vs. high power compliance is dependent on the integrity of the operator
  - Turning down your current rig's output power level needs to be confirmed with an accurate meter
  - Avoid temptation of bumping it up "just a tiny bit"
  - Using QRP only radio removes questions

# My First Shack

- Ten-Tec Argonaut 515, in an easily moved wooden case
- I didn't listen to "advice" from other hams—"Novices Shouldn't Start with QRP"

# Ten Tec

- Odyssey of the Argonauts (and beyond) a story of early Ten Tec QRP Radios

- Slideshow-  
[tiny.cc/ooa](https://tiny.cc/ooa) 
- *Video* 

## Odyssey of the Argonauts (and beyond)

- Argonaut VI
- Argonaut V
- Argonaut II
- Argosy

- Flex

- 1500

# Tips for QRP Success

# Top 15 Tips for QRP Success

1. Use best possible Antennas & feedline for situation
2. Develop Good Operating Techniques
3. Operate during Contests & high volume activities
4. Understand your Radio (know how to use features including filtering, split operation, memories, TX audio tailoring, etc.)
5. Be Persistent (you probably will not be first to break every pileup)

# Top 15 Tips for QRP Success

6. Learn to be a skillful Search & Pouncer (but don't be afraid to call CQ at strategic times)
7. Be there near the end of contests as "fresh meat"
8. Don't append QRP to you call (especially in pile ups & contests)
9. Understand Propagation & current conditions
10. Try using highest freq open band

# Top 15 Tips for QRP Success

11. Operate on as many bands as possible, especially lesser used bands (30, 17 & 12)
12. Operate multiple modes, each mode you operate increases your chances (CW, SSB, DATA)
13. If you don't currently operate CW, learn at least enough to make simple Contest & DX contacts
14. If you haven't tried FT8/FT4 you are missing a great weak signal mode

**15. Get on the Air as Often as Possible**

# Develop Good Operating Techniques

- Try to always use the best operating technique, with QRP power you do not have as much margin for error as QRO, if you want to make QSOs
- Listen, Listen, Listen
- Understand the Timing, Rhythm, Rhyme & Dance of QSOs– [tiny.cc/r-r-d](http://tiny.cc/r-r-d)📧

**How to Make That QSO-**  
**Get in the Rhythm,**  
**Know the Rhyme &**  
**Dance the Dance**

**Anthony Luscre, K8ZT**

# Develop Good Operating Techniques

- Mimic efficient and effective operators
- Know Procedures:
  - S.O.P. including typical contest exchanges
  - Variations by
    - Contest
    - Mode
    - Specific Station you are trying to work
- Good Etiquette still matters with QRP

# Successfully Making Exchange

- Give your exchange in the expected/accepted order/manner
- Use correct abbrev. for Counties/States
- On phone use phonetics as necessary

# Successfully Making Exchange

- If the station has not successfully received your call or exchange?
  - If CQing station is having a problem with your call and/or exchange, consider repeating it twice but don't get carried away with endless repeating
  - Consider alternative phonetic for missed letter(s)
  - Excessive use of sending double calls/exchanges in good conditions can frustrate other stations and greatly slow things down

# Successfully Making Exchange

- On phone, good operators can add a cadence & pitch to the voicing of the exchange that clarifies different portions of the exchange and can enhance the ability to copy it
- On CW, proper spacing is very important

# Successfully Making Exchange

- If the station repeats back to your exchange with a ? (Questioning or Please Confirm)
  - **Confirm it, if it was correct-**  
a quick CFM, RR, Confirm, Roger or QSL will do
  - **If it was wrong-** send NO, NEG or say Negative, then repeat corrected exchange

# Successfully Making Exchange

- If the station is not successful at getting your exchange after multiple tries they may send:
  - LATER (Try Later)\*
  - NIL (No contact was made, DO NOT LOG)
  - SRI (Sorry)
  - They start just calling CQ or QRZ again with no acknowledgement- (No contact was made, DO NOT LOG)

\* Make a note of freq and try later

# Planning– Picking a Specific Contest

- Unlike most other sports competitions, in Radio Sport, contestants get to choose their own “Playing Field”

# Planning– Picking a Specific Contest

- By choosing specific contests and entry categories you can best match your...
  - Interests & Modes
  - Operating skills
  - Radio equipment & antennas
  - Level of competitiveness

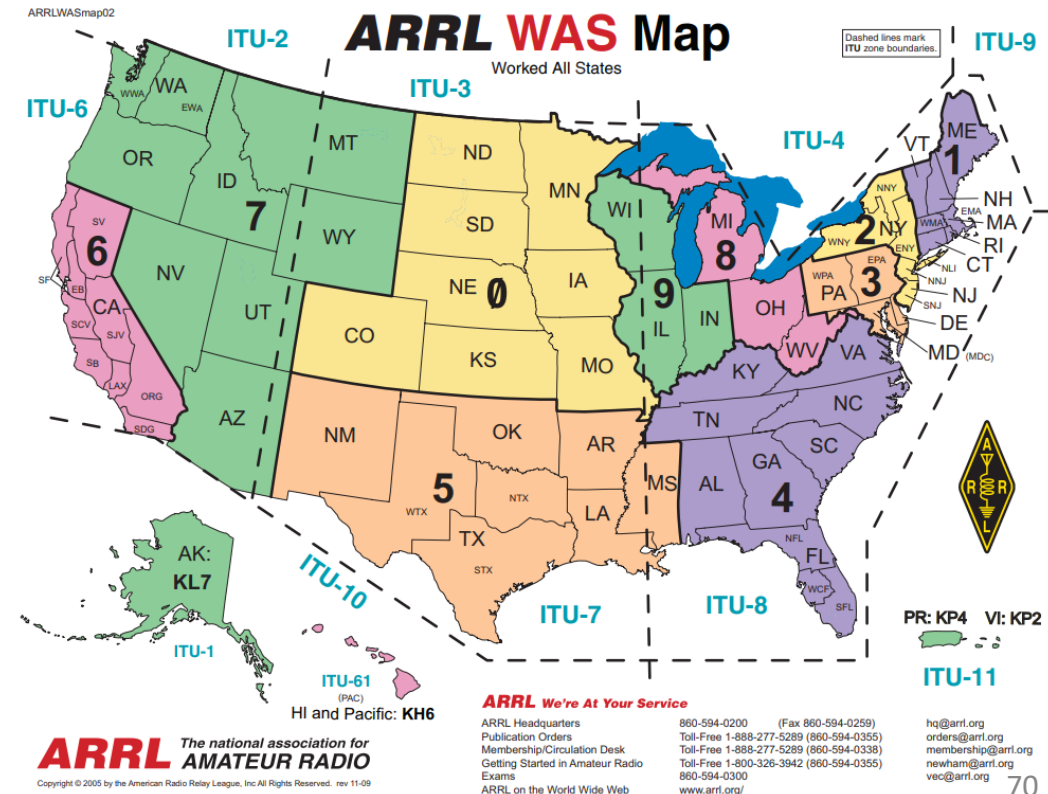

# Planning– Picking a Specific Contest

- You can also choose specific contests that also favor...
  - Your Geographic Location
  - Specific Bands
  - Increasing your DXCC, WAS, etc. totals
  - Winning or finishing in a top spot

# Planning– Strategy & Scheduling

- Know Who Will Be There
  - *NG3K* Amateur Radio Contest/DX Page (ADX0)
  - Learn calls, locations, habits of contesters
    - Especially **atypical calls for specific multipliers**
  - Who to spend extra time trying to work vs. what will be available throughout contest
  - Who & When to target for rare zone or grid mults

# Planning- Strategy & Scheduling

- Know When They Will Be There
  - Propagation Predictions & Previous Results
  - Operator Habits
  - 2nd Day Chances
  - Don't miss short band openings
  - Grey Line can be your low band friend
  - It's hard to beat quality BIC Time to improve score

# QRP/LP Contesting Summary

- Work Mults, don't miss extra chances
- Timing & Technique are Critical!
- Harvest Qs, remember points are vital & if not CQing, Harvest
- Call CQ if & when opportune
- Plan ahead- ADXO, Prop, etc.
- BIC- Butt In Chair Time Critical + Persistence
